

P6200

Baggage Chute

SA Lightweight and maintenance-free modern solution

This new **PAGE GSE P6200 Baggage Chute** has many features of the original Baggage Chute but now utilizes modern manufacturing techniques and materials.

The new P6200 series are the best and most advanced Baggage Chutes for transferring passenger luggage and carry-ons from the cab of the passenger boarding bridge to the tarmac without having to require personnel to carry items down the stairs.

Features

- Durable and sturdy 1.5 in. tubular steel supports
- Corrosion-resistant rigid doubled-wall polyethylene descending chute sections are lightweight and maintenance-free.
- The easiest and fastest installation - requires no special tools
- Available with or without an upper landing section to meet all customer and budget requirements'
- P6200JW bracket option for certain model PBBs
